McMillan Data Communications Clarifies Company History & Focus

San Francisco, CA, February 4, 2021

In an effort to alleviate market confusion with other companies who carry the “McMillan” Branding we offer this clarification on McMillan Data Communications (MDC).

MDC founded in 1990 by Patrick McMillan Jr. with a focus on on-premise wiring. In 2008, MDC incorporated with the state of California and began operating independently from McMillan Electric.

Today, the original managing Partners, Jim Murray and Mark Mahoney, have continued the company’s trajectory with decades-long experience performing large-scale structured cabling, audio visual, and low voltage projects, with over 120 technicians at times and many team members who have been with the company since inception.

Continuing the succession of MDC, new leaders, Justin Mehtlan and Luke Pearce have recently been added to the ownership team to continue the vision of success for their clients, partners, and employees.

“The quality of work we perform is a testament to our company’s extensive experience and our ability to design and build the largest scale projects out there,” said Jim Murray, CEO at MDC. “My partners and I have been in this business for over 30 years, and we pride ourselves on our premier service and the ownership we take in managing the entire process for our clients. MDC’s extensive partnerships and certifications with the leading global manufacturers, plus our industry experience, enables us to manage and build any project seamlessly to make it easy on our clients.”

McMillan Data Communications, Inc.

PO Box 880307 San Francisco, CA 94188 | (415) 992-6582 | info@mcmillanlv.com | License: 947775-C10
